Revision 1, December 2018

BREXIT – PESTICIDES: RE-ALLOCATION OF EVALUATIONS

The United Kingdom submitted on 29 March 2017 the notification of its intention to withdraw from the Union pursuant to Article 50 of the Treaty on the European Union. This means that unless the withdrawal agreement establishes another date or the period is extended by the European Council in accordance with Article 50(3) of the Treaty on the European Union, all Union primary and secondary law ceases to apply to the United Kingdom from 30 March 2019, 00:00h (CET) (hereafter called 'withdrawal date'). The United Kingdom will then become a 'third country'."

As of the withdrawal date, the United Kingdom can no longer act as rapporteur Member States (RMS) for the assessment of applications related to active substances or evaluating Member States (EMS) for applications related to maximum residue levels (MRLs). This also holds if a withdrawal agreement, with a "transition period", is concluded. During the transition period, the United Kingdom can no longer act as RMS or EMS.[1]

Against this background, the Commission has re-allocated substances for which the United Kingdom has been the rapporteur or evaluating Member State. The re-allocation has been made in agreement with the 27 Member States and Norway on 12 December 2018. This document sets out the re-allocation of all future, ongoing and recently completed assessment as regards renewal of active substances, new active substances (NAS), confirmatory information, MRL reviews, MRL confirmatory data, MRLs for new uses, and Import Tolerances.

The re-allocation set out in this document remains valid until another Member State will be formally designated as rapporteur Member State in view of future applications for renewal of approval.

[1] Article 123(6) of the draft Withdrawal Agreement, as agreed at negotiator's level between the EU and the UK.
